

Appendix 1

# **Proposed Four-Stage Model for Infusing Engineering Design into K-12 Curriculum**

For

HIGH SCHOOL APPROPRIATE ENGINEERING CONTENT KNOWLEDGE IN THE  
INFUSION OF ENGINEERING DESIGN INTO K-12 CURRICULUM

(Under the General Topic of “Engineering Design in Secondary Education” and of  
“Vision and Recommendations for Engineering-Oriented Professional Development”)

Summer 2009

College of Education  
University of Georgia

Professors:

Dr. Robert Wicklein, Dr. Roger Hill and Dr. John Mativo  
(College of Education)

Advisors:

Dr. Sidney Thompson and Dr. David Gattie  
(Driftmier Engineering Center)

Student:

Edward Locke (edwardnlocke@yahoo.com)

Last Review Date:

Thursday, July 9, 2009

Note:

This Appendix to the Research Project has been originally written during Fall 2008, in the NCETE Core 3 - Engineering Design: Synthesis, Analysis, and Systems Thinking course taught from the University of Georgia, by Dr. Robert Wicklein and Dr. Roger Hill (Workforce Education) Dr. David Gattie, Dr. Nadia Kellam and Dr. Sid Thompson (Driftmier Engineering Center).

The Proposed Model explored in this Research Paper has been presented at the International Technology Education Association’s 71<sup>st</sup> Annual Conference held in the Kentucky International Convention Center (Friday March 27, 2009, in Louisville, Kentucky), under the sponsorship of Dr. John Mativo.

Review and editing has been made during Summer 2009

## Table of Content

<b>Content</b>	<b>Page</b>
Introduction - The Rationale for Writing This Paper .....	2
Background of this paper.....	2
Objective of this paper .....	3
Dr. Roger Hills’ constructive philosophy, Dr. Robert Wicklein and Dr. Jay Rojewski’s critical advice for K-12 technology education reform, and potential significance of this paper .....	4
Part One - Literature Review .....	7
Conclusions from previous scholarly research .....	7
Implementation of scholarly guidelines in the proposed model .....	8
Part Two - The Construction of a New Bachelor of Science Degree in K-12 Engineering and Technology Teacher Education as a Logical Extension of the Existing Career and Technology Education Program at the University of Georgia .....	10
What high schools need for the years to come: The goals of the Georgia Department of Education for K-12 Engineering and Technology Career Pathway .....	10
How we are preparing our K-12 educators for the years to come: The requirements of UGA Bachelor’s of Science in Education Degree in Career and Technology Education (Technology Education Certificate) Program .....	11
The pre-engineering preparation of high school students needed for a smooth transition into University undergraduate engineering programs .....	12
Rationale for infusing engineering design into technology curriculum: Bridging the gaps among k-12 engineering and technology curriculum, teacher education, and university engineering majors .....	14
Basic components of a practical model for infusing engineering design into K-12 engineering and technology teacher education program at university level .....	17

## Table of Content (Continued)

<b>Content</b>	<b>Page</b>
A practical need for change .....	23
The proposed program as a modified version of the existing program at UGA .....	24
Incorporation of the conclusions from the dissertation of Dr. Phillip Cameron Smith Jr. into the proposed model .....	32
Part Three - The Overall Structure of the Proposed Model for Infusing Engineering Design into K-12 Engineering and Technology Teacher Education Curriculum: A The Four-Stage Model .....	38
Linearly incremental progression of engineering design process in the Regular Curriculum for the proposed K-12 Engineering and Technology Teacher Education program.....	38
Recursive iteration of engineering design process in extracurricular activities .....	41
Part Four - The Ultimate Expected Outcome of the Proposed Model: A Focus on Future K-12 Students .....	43
A streamlined engineering and technology education across K-12 and collegiate levels .....	43
Infusion of engineering design throughout the K-12 education .....	46
Vital issues affecting contemporary engineering design and innovation .....	49
Educating new generations of ethical and ecologically-conscious and yet profitable innovators and inventors .....	51
Limitations on expected outcome .....	53
Potential contribution of the proposed model .....	54
Part Five - Making Design the Integrating Factor Linking Engineering and Science Through High School Engineering and Technology Program .....	55

## Table of Content (Continued)

<b>Content</b>	<b>Page</b>
1 <sup>st</sup> approach (a moderate approach): Infusing engineering and technology topics into K-12 mathematics, physics and chemistry courses .....	56
2 <sup>nd</sup> approach (a drastic approach): Decomposing mathematics, physics and chemistry courses into modules and incorporating them into an integrative STEM curriculum throughout K-12 education .....	57
Part Six - Feasibility of the Proposed Model .....	58
Part Seven - Available Pedagogic Resources for the Implementation of the Proposed Model .....	65
Part Eight - The Potential Value of the Proposed Model: The Fundamental Differences between the Proposed Model and the Existing Programs .....	66
Major differences between the proposed model and existing programs .....	66
Moving beyond engineering and technology education .....	73
Summary and Recommendations .....	76
References .....	78

## List of Tables

<b>Table</b>	<b>Page</b>
Table 1. State of Georgia Career Pathways in Engineering and Technology .....	10
Table 2. Comparison Between Georgia DOE High School Career Pathways and B.S. in Education in Career and Technology Education at UGA .....	12
Table 3. Comparison between Georgia DOE High School Career Pathways Program and Engineering Programs at UGA .....	13
Table 4. Proposed new B.S. in Education Degree in K-12 Engineering and Technology Teacher Education for the College of Education, University of Georgia .....	15
Table 5. Foundation Engineering and Technology Courses .....	27

## List of Tables (Continued)

<b>Table</b>	<b>Page</b>
Table 6. Courses under Engineering Analysis and Technology Options .....	28
Table 7. Capstone Engineering Design Courses .....	28
Table 8. The Proposed General Model of K-12 Engineering and Technology Teacher Education for the National Center for Engineering and Technology Education .....	30
Table 9. Incorporation of Dr. Smith and Dr. Wicklein’s items into the Proposed Courses .....	32
Table 10. Engineering-Focused Curriculum for High School .....	55
Table 11. Major Differences between the Proposed Model and the Existing Programs .....	72

## List of Figures

<b>Figure</b>	<b>Page</b>
Figure 1. Relationship among the three components in the K-12 through university engineering and technology cycle .....	13
Figure 2. The three components for including engineering design into K-12 engineering and technology teacher education programs, and “concept map” for infusing engineering design into K-12 engineering and technology education .....	19
Figure 3. My Combined Engineering and Technology Design Process, its integration into the K-12 Engineering Design Process adapted by NCETE, and the model of teaching .....	22
Figure 4. Road map showing the sequence of engineering analysis and design content in the proposed K-12 Engineering and Technology Teacher Education .....	37
Figure 5. Road Map for an Integrated Engineering and Technology Curriculum (K-12 to College) for Mechanical Engineering Career Pathway .....	44

## List of Figures (Continued)

## List of Appendices

<b>Appendix</b>	<b>Page</b>
APPENDIX 1-A - Sample Units .....	81
APPENDIX A-1-1 - Sample Unit 1: Engineering Design Idea Generation (“Creative Conceptual Design” Stage, Using “Brainstorming Sessions”) ....	81
APPENDIX 1-A-2 - Sample Unit 2: Engineering Design Experiment “Technology Education Design” Stage .....	101
APPENDIX 1-A-3 - Sample Unit 3: Well-structured Problem and Simple Engineering Design “Analytic Reduction” Stage “Combined Engineering and Technology Design Process” .....	113
APPENDIX 1-A-4 - Sample Unit 4: Ill-structured Problem and Complex Engineering Design “Systems Thinking” Stage of Holistic Design “Combined Engineering and Technology Design Process” .....	122
APPENDIX 1-B - The United States Department of Labor State Occupational Projections - Long Term For Engineering and Technology Professional .....	134
APPENDIX 1-C - Revised and New Course Description for the University of Georgia and the National Center for Engineering and Technology Education .....	140
APPENDIX 1-D - Proposed New Course Syllabus for the University of Georgia	150
APPENDIX 1-D-1 - ETES 5090B/7090B - Principles of Technology: Strength of Materials & Material Selection .....	151
APPENDIX 1-D-2 - ETES 5090E - Mechanism Design and Selection (Pre-Calculus Version) .....	153
APPENDIX 1-D-3 - ETES 5110B/7110B – Engineering Design II .....	156
APPENDIX 1-E - Available Resources for Infusing Engineering Design into K- 12 Engineering and Technology Curriculum .....	159
APPENDIX 1-F - My Four-Stage Curriculum Model for Incorporating Engineering Design Into K-12 Technology Education Programs For the State of California Through California State University Los Angeles .....	167

## List of Appendices (Continued)
